

Priorities needs challenges and barriers, especially, especially in developing countries along with an overview of national measures...

OP3(d): “To develop, implement and update national action plans reflecting country-driven approaches to contribute to the objectives of the instrument.”

Three main phases for developing national action plans

---

Preparatory activities

---

Identification of priorities and intervention opportunities

---

Policy development and implementation

# Potential priorities for national action plans in the Pacific region

The identification of priority resins and products

The identification of leakage hotspots

Plastics reduction targets, caps on imported resins and plastic production and imports.

Legislating extended producer responsibility and developing sustainable financing mechanisms and schemes to incentivize reuse, refill, right to repair, recycling, and remediation.

Public-private partnerships

A science-policy interface
